

# IPAFIX

---

## Substitute for Isopropyl alcohol

### ***Key Characteristics***

- Dosage: 3 - 5 %
- For sheetfed and heatset application
- Increases water transport in the dampening unit

### ***Features and Benefits***

#### **Low consumption**

- In average 60% less than current dosage
- Reduces VOC-emissions

#### **Universal in use**

- Compatible with all fountain solutions

### ***Instructions for use***

Dosage: approx. 40% off the dosage of Isopropylalcohol. Ipafix can be dosed by the standard IPA-dosing device.

### ***Transport & Storage***

Protect against extreme weather conditions.

Do not store at temperature above 35 °C or below -10 °C.

Take all necessary precautions to avoid environmental pollution due to accidental leakage.
