SVHC statement for product range BluePrint Products nv

To Whom It May Concern:

Within all our R&D efforts, it is a priority to select only those raw materials that will create or leave the least possible burden to the environment. Consequently we do not use, and do not intend to use in the future, any of the products listed as "SVHC" (Substance of Very High Concern), including the "candidate list" as published by ECHA and last updated on the 10th of June 2022: <http://echa.europa.eu/nl/candidate-list-table>.

We hope to have been of assistance. Don't hesitate to get back to us in case additional info is required.

Kind regards,

The compliance team

A handwritten signature in blue ink, appearing to read "De Smet".
